RESEARCH INTERESTS

My research integrates vision, language, and audio through multimodal learning, aiming to build systems that understand and interact with humans. I work on speech-driven 3D facial animation, where phonetic and articulatory cues guide audio-visual generation, and on multimodal large language models (MLLMs) that extend language understanding beyond text. I am now extending this line toward socially-aware systems that reason about human interaction across modalities.

Multimodal LLM (MLLM)

- LLM + Visual/Audio

Cross-modal Learning

- Language + Visual/Audio

Social Artificial Intelligence

- Social Understanding/Reasoning

EDUCATION

Chung-Ang University

- Ph.D in Imaging Science and Arts
- Advisor: Prof. Hak Gu Kim

Mar. 2025 –
Present

Chung-Ang University

- M.S. in Imaging Science and Arts
- Advisor: Prof. Hak Gu Kim

Mar. 2023 –
Feb 2025

Konkuk University

- B.S in Computer Science and Engineering

Mar. 2016 –
Feb 2023

AWARDS

Excellence Research Award

- 2025 Virtual Convergence Graduate School Symposium

Aug. 2025

Best Paper Award

- 37th Workshop on Image Processing and Image Understanding

Feb. 2025

PUBLICATION

- Seeing Speech: Learning Visible Articulatory Dynamics for Speech-Driven 3D Facial Animation
Hyung Kyu Kim, Byungchan Hwang, and Hak Gu Kim
Conference on Neural Information Processing Systems (NeurIPS) 2026 [Submitted]

2. ArtBoost: Synthetic Articulatory Data Augmentation for Acoustic-to-Articulatory Inversion
Hyung Kyu Kim, Byungchan Hwang, and Hak Gu Kim
Interspeech 2026 [Submitted]
3. MemoryTalker: Personalized Speech-Driven 3D Facial Animation via Audio-Guided Stylization
Hyung Kyu Kim, Sangmin Lee, and Hak Gu Kim
International Conference on Computer Vision (ICCV) 2025
4. Learning Phonetic Context-Dependent Viseme for Enhancing Speech-Driven 3D Facial Animation
Hyung Kyu Kim and Hak Gu Kim
Interspeech 2025 (oral)
5. Analyzing Visible Articulatory Movements in Speech Production for Speech-Driven 3D Facial Animation
Hyung Kyu Kim, Sangmin Lee and Hak Gu Kim
IEEE International Conference on Image Processing (ICIP) 2024
6. Unveiling the Potential of Multimodal Large Language Models for Scene Text Segmentation via Semantic-Enhanced Features
Ho Jun Kim*, Hyung Kyu Kim*, Sangmin Lee and Hak Gu Kim (*equal contribution)
IEEE International Conference on Image Processing Workshop (ICIPW) 2024
